Especially well received was the brand-new CLEANSTIC 4.0 presented by CLEANAQUA Blue, in addition to the Emergency drinking water device for doctors that can be used in crisis areas, especially in African

countries to disinfect a glass of water or a carafe with water for less than 1 minute and drink safely.

CLEANAQUA Blue will record this positive international response to the new disinfection equipment and evidently high demand in its future planning to attract investors for the volume production of CLEANSTIC and emergency drinking water.
